

Lumen® Cloud Communications

Effective business voice and collaboration from a trusted provider

Your organization needs an easier, more effective way to communicate with customers, prospects, and each other to drive growth and innovation, while lowering costs and delivering more value. Lumen Cloud Communications delivers a voice, collaboration, and video experience your team can trust, delivering simplicity and flexibility to your business. Lumen's platform has the security, reliability, flexibility, and global scale to deliver your company UCaaS solutions to empower productivity and elevate customer experience.

Enhance productivity

- Avoid or eliminate time and IT resources managing and maintaining end-of-life technology. Get a single interface that can manage your calls, messages, and video meetings in one application that includes dedicated support from our team.

Lower operational cost

- Lumen delivers a streamlined solution for PSTN access with next generation features included. Working with a single cloud provider avoids future capex spend as upgrades and maintenance are included with future releases.

Flexible packages

- Choose the right level of service to meet your needs. All packages include unlimited local and domestic long distance voice, as well as a cloud PBX with migration and installation support at the level you need.

47% of businesses currently use Hosted VOIP/UCaaS. 32% of businesses plan to use Hosted VOIP/UCaaS in 2 years.”
